

AME SOLUTIONS

Monitor the Health of Your Reciprocating Machinery Online

Staying ahead of machinery failures is critical to minimizing a vessel's downtime, avoiding costly repairs and maximizing efficiency. Ame Solutions is now offering the latest generation of online monitoring with the Windrock Platinum system. To protect and assess the health of your reciprocating machinery, the Platinum Systems uses technology proven in the Windrock On-Guard and 6400 portable analyzers, as well as RECIP-TRAP analyzers. The handy diagnostic helps engineers quickly identify valve, ring and other leakages using real-time data. amesolutions.com

IDWAL MARINE

Launches New Online Ship Inspection Platform

Idwal Marine's online ship inspection platform provides owners, brokers, charterers, and financial organizations with access to a global network of ISO-certified ship inspectors, and instant quotes on vessel condition, pre-purchase, and pre-charter inspections. Users can track the progress of each inspection, receive photographic and documentary evidence and download full condition reports through the free online interface. The platform provides analysis in reports that are easy to decipher and benchmark against an 'at-a-glance' ship grading system. www.inspectmyship.com

SIMRAD

Breaks New Ground with NSS Evo3

Designed for offshore fishermen that demand the perfect sportfishing sonar, the new Simrad NSS Evo3 includes dual channel CHIRP, enabling wide angle and deep view sonar images from the same transducer, displayed on the most advanced in-plane switching screens in the marine industry. With the ability to add award-winning Simrad radar systems and ForwardScan sonar to navigate with more confidence, the Simrad NSS-9 Evo3 is breaking new ground! www.simrad-yachting.com

VESON NAUTICAL

Launches IMOSlive—Shipping Platform Optimized for the Web

Veson Nautical has introduced Veslink IMOSlive: The world's first complete shipping platform – optimized for the web. Built on the foundation of IMOS, the industry-standard solution for commercial maritime operations for more than a decade, Veslink IMOSlive brings the core IMOS workflows to the web. The result is the first comprehensive online platform for marine Chartering, Operations, Financials, and Analytics that serves all industry verticals. www.veson.com

VIEGA

New Viega ProPress for Copper Fittings

Viega has introduced its line of Viega ProPress Zero Lead Ball Valve press x hose thread for copper fittings. The bronze ball valves are full port and designed for potable water applications. The patented Smart Connect feature, available only from Viega, provides installers with added confidence in their ability to ensure the integrity of connections. The Viega ProPress joins copper tubing in seconds without flame or heavy equipment. The system is customizable. Viega ProPress fittings are available with EPDM, HNBR and FKM sealing elements. www.viega.us
